GROWERS OF FINE HYBRID HIBISCUS

For some time I have been interested in the growing of fine hybrid hibiscus. From experience I have selected the very best growers and bloomers from the many varieties on the market. All my hibiscus are grown in gallon cans and are grafted on either Painted Lady or Scarlet Red understock, which in my opinion makes the best root stock. I always try to give my customers good healthy plants that are true to name. I am a member of the Florida Nurserymen and Growers Association, The American Hibiscus Society and The Greater Miami Hibiscus Society. I will pack 15 or more plants for shipping for an additional charge of 15¢ per plant. On orders of 50 or more plants there is no packing charge. Please advise if willing to accept substitutions for varieties sold out. When necessary to substitute I always try to give as good or better plant than the one ordered. At the present time I have the following varieties for sale:
